

Marsee 12L Expandable Tear Drop Tank Bag Features and Benefits

Marsee 12 Liter Tear Drop Quick Release Tank Bag

MAR-12DQR

FEATURES

- 1 Mounting. For the first time Marsee tank bags are utilizing YKK Center Release Mono Buckles.

The bag comes with two sets of straps that allow the bag to be mounted three different ways. Always place the bag on the bike in the desired position it is to be mounted and.....

- 2 Sloped base (tear drop shaped bottom) with non-slip Tough-Tech fabric on bottom

- 3 Removable, adjustable molded carry handle with webbed ends

- 4 Map pocket with 360 degrees waterproof zipper

- 5 Foam compartment located under map pocket.....

BENEFITS

a. The Mono Buckles rotate about 90 degrees giving a better strap mounting angle when the bag is being mounted to the frame. The 90 degrees adjustability also permits the buckles to rotate far enough to mount the bag as a seat bag, if so desired.

a. Four straps are included that have "loops" at the end which allows the straps to be wrapped around frame tubes (ideal for trellis framed bikes)

b. Two long straps without sewn in " loops" are supplied mounting the bags in the conventional Marsee 4 point application. A set of "retention loops" are included to keep the straps from falling when the bag is removed but the straps remain attached to the bike.

c.

These same two long straps can be laced through the Mono buckles and turned 90 degrees, so the straps can be run under the seat and mounted in a seat mount configuration This application is meant for short term purposes and not for permanent application

a. The contour of the base allows the bag to conform to most tanks with a "tear drop" or sloped shape

b. Tough-Tech fabric has excellent grip and is non-abrasive

a. The user can remove the handle and stow it inside the bag if additional fore and aft room is needed to better fit the bag to the bike.

b. In situations where the handle vibrates on the tank, the handle may be removed and placed inside the bag

a. The heavy duty vinyl is impervious to UV light and will not fade

b. The map pocket is dual layered vinyl with a zip lock opening, the circumference of the pocket is heat sealed rendering waterproof in all but the most adverse conditions

c. The waterproof zipper on the map pocket in conjunction with the zipper attaching it to the bag create an additional pocket with a closed cell foam piece which can be cut to accommodate a variety of accessories, such as a cell phone GPS, radar detector, etc. The foam already comes precut for a cell phone.

d. To have visual contact with items stored in the foam compartments requires the removal of maps or other opaque objects that may be in the map pocket. Since the map pocket vinyl is flexible button operations on accessories in the foam compartment are possible.

Marsee 12L Expandable Tear Drop Tank Bag Features and Benefits

- 6 Four inch expandability, with compression cords and locks**
- The bag may be expanded an additional 4 inches in height by unzipping the expansion chamber
 - The height is adjustable by pulling the cords on both sides of the expansion chamber and locking the location in using the affixed cord locks
 - To help prevent shifting of the contents inside the bag tighten the cord and cord locks
- 7 Three "D" rings**
- The two "D" rings at the end of the bag are for mounted the shoulder strap included with the bag.
 - All three "D" rings may be used together or separately to bungee on items such as gloves, rain jackets, etc.
 - A Marsee carbineer may also be attached to the "D" rings
- 8 Hydration clip mounted on the side of the bag**
- This clip is needed to mount the drinking tube of the Marsee Hydration systems. 1.5 Liter Marsee Hydration System (MAR-HYD1.5) or the 3.0 Liter Marsee Hydration System (MAR_HYD3). These systems may be stored in the tank bag or in the cavity between the tank bag and the removable base.
- 9 The perimeter of the bag has reflective piping**
- Makes bag more visible in low light conditions
- 10 End compartment with dual pockets, one up and one down**
- The top pocket with a waterproof zipper and silver lined interior is for sun glasses/glasses, coins and other small objects the rider may need at close hand. The silver lining makes it easy to identify dark objects that may be stored internally. The waterproof zipper helps to make the interior more waterproof.
 - The bottom pocket offers quick access and convenient location for the standard rain cover
- 11 Hidden pocket under the end pocket**
- This pocket secured with a waterproof zipper and seam sealed edges, 9 inches deep id for storing items that are precious, such as pass ports, money, etc.
- 12 Removable base with additional map pocket**
- The waterproof zipper unzips the bag from the base so the base can stay conveniently on the bike.
 - The base has another heat sealed map pocket with zip lock style opening for additional map storage or document storage. Also can hold maps for day rides where the bag isn't needed but a map is.
 - There is a storage pocket under the map pocket for items such as gloves, etc.
- 13 Main compartment lid**
- Is accessed via a waterproof zipper to keep out moisture and other undesirable elements
 - Retention straps hold the bag open when the bag is unzipped
 - Internal storm flap, repels dust and moisture and adds rigidity to the side walls of the bag.

Marsee 12L Expandable Tear Drop Tank Bag Features and Benefits

d. Inside of lid has an organizer area with an I.D tag holder that can supply medical alert, blood type and contact information.

e. There are two zippered pockets one at the top and one hidden around the perimeter of the bottom
