

Marsee Corona Mount Bag for BMW K1200LT

January 2009

A note from Tom Volk (company owner):

I own a 2003 BMW K1200LT . Since I bought the bike new in 2003 I have used a Chicane tank bag. The bag has been great except for the constant fiddling I have had to do with the Velcro tabs and closure 'hook' that hold the bag on the bike. Plus---the bag was looking its age and needed replacing!

Like every other LT owner has discovered--tank bag options have been very limited. Chicane is out of business and I was frustrated.

Late last fall, we acquired Marsee Products. I have used Marsee bags over the years on several bikes and am really excited to have Marsee as part of the RPW Motorcycle Accessories Division.

Over the last several months I have been trying to figure out how to use a Marsee tank bag on my LT. After many 'experiments' I have come up with what I think is an excellent solution!

Installing a corona ring mount on the oddments box lid allows the 6L or 10L Corona mount Marsee tank bag to fit and work well on my LT. The ring mounts easily with four bolts holding it in place. The oddments box lid has a metal backing plate that is a very good mounting platform. The 6L or 10L Corona mount bag fits with the ring and makes for a very 'clean' and secure mounting system for the tank bag. Easy on and easy off.

We have put together a special package and price just for LT owners. The package contains your choice of either a 6L (soft, traditional map pocket) or 10L (hard, polycarbonate map pocket) bag, corona ring, and mounting hardware. You only have to drill 4 small boltholes in the oddments lid and bolt the corona ring to the lid using the enclosed hardware. The bag then simply twists on and off!

The normal price for the Marsee 6L Corona mounted bag is \$195 and the 10L Corona mounted bag is \$225. We are selling this special 'LT package' for \$135 with the 6L bag or \$165 with the 10L bag. (Please note that the Corona ring for this kit will not bolt to any BMW gas caps openings--contact me if you have questions on this).

You can add the Electrical Kit 'A' for an additional \$80 (it will then come installed in the bag). Please note: the Kit 'A' power plug is a few inches short if you want to plug the electrical cord from the bag directly into the outlet next to your left leg. You will need to get the extension cord (PWR-PAC-022-24, cost \$8.95) or make your own extension.

Attached are several pictures of my bike with this 'package' installed. FYI--just like the Chicane bag I have used for years--the handlebars slightly touch the sides of the bag when turned 'lock to lock'. However, I have never had an issue in any actual riding conditions.

Please let me know if you have any questions about this package.

As an additional 'bonus' (I am beginning to sound like an Infomercial-'But wait there's more.')--We will include a free Marsee sunglasses holder with your order.
